# Bahnsen es2000 user manual

Compressed air tower (GDM-AT) or desiccant-dryer (GDMD) models that offer a low-range dehumidification capacity. High-level encryption and digital signatures are supported for paperless operations. Real-time trend of temperature and humidity parameters and adjustment points. All settings of control parameters, alarms and set points are maintained during the power failure, and the restart is automatic when the power is restored. The removable memory card allows you to export and import profiles, alarm files, audit tracking files and other data files. These include: actual temperature, actual humidity, process set points and system alarms with name and date/time of the alarms. The 7" A display supports low to high room light levels. Construction features and options include: Heavy-caliber stainless steel interior with scratch-resistant enamel on the exterior of the wardrobe. Each size of the camera is provided to allow ease of passage through a standard door. Alarm action delays and audible alarm delays can be adjusted from 0 to 60 minutes in 1-minute increments. A drag-and-close feature allows you to enlarge views within a specific plotting period. Electrical/control system Our control panel is completely closed and wired according to NEMA 1, NEC and UL/MET specifications. The humidity system features: High power steam generator that provides controlled humidification with precision. Features include: Configuration of temperature display in  $^{\circ}\text{C}$  or  $^{\circ}\text{F}$ . A percentage delay adjustment allows the electric heat to be installed sooner or later depending on the heat demand and the ability to control the hot cooling gas. usable. Automatic time or temperature Activated hot gas / the electrical defrost provide with  $\text{\AA}$   $\text{\AA}$  Intelligent  $\text{\AA}$   $\text{\AA}$  Adaptive defrosting timer  $\text{\AA}$ ; Time or temperature initiated and time or temperature finished. Zero switching outputs avoid unnecessary radio frequency interference. Menu selections and instructions on screen with on screen screen They are detailed enough to allow normal daily use without reference manuals. Precision RTD temperature sensor, calibrated platinum according to NIST tracing standards. Distributed load, and offers more than 6 sq. Humidification is deactivated below freezing, and dehumidification is deactivated under selected fabric conditions where drying is not required. This allows remote visualization of chamber and alarm process variables through a web browser. Product Shelves Stainless and solid stainless steel shelves are provided with each camera, with additional shelves available under request. Alarm silence function in all parameters with up to 60 minute delay time (individually adjusted for each parameter). All control circuits and bifurcation circuits are individually protected against fuses. The characteristics of the heating system include: Nichrome wire duct type heater providing a quick and accurate response. Detailed scheme generated by computer provided with the Operation Manual to help in the field service and troubleshooting. Pt. Ethernet connectivity. Automatic alarms deactivate specific controlled devices (heaters, blowers, steam generators, etc.) The alarm monitoring functions include: alarm notification through a red wallpaper, Audible Alarm Activation, Switching From a set of remote alarm contacts and creation of an alarm record with time, date and alarm type. The stainless steel deposit (type 316), the Incoloy heater and the solenoid filling system powered by the float switch. Removable stainless steel plastic cover and wall air hangers to facilitate cleaning and maintenance. The .acirbJf .acirbJf ne adavitca lepa nis n'Aicabarg ed n'Aicop al noc selbinops nJAtse ovihcra ed sedadillu saL .CFC ed serbil y socix'At on ,soruges etnemlatneibma setnaregirfer noc eria rop odaregirfer odalles etnemacit'Amreh roserpmoC :setneugis sal nos lanoicroporp n'Aicaregirfer ed ametsis led sacitsAretcarac saL .acirbJf ne adavitca lepa nis n'Aicabarg ed n'Aicop al noc anoicroporp es soci'Astih sotad ed The valve cooling control provides a greater heat elimination capacity than conventional designs of capillary tubes and provides an immediate response to the added tilt loads. Independent time delay action for each alarm parameter. High and low humidity capacity depends on your model selection. Heating system The supplementary heating is provided by a low watt density heating element encapsulated in a stainless steel frame. The features include: Logical control program is stored in a non-volatile, high-capacity US memory card. Next, the air is distributed and returns through the lateral ports of the Plenum, which are specifically arranged for maximum uniformity and efficient technical transfer: A tactile screen icon «Print» allows a tactile impression of data trends in report format or graphic. Configuration of relative humidity in% HR (if applicable). Cabinet Construction Our Double Wall Chamber Construction provides you with continuous and trouble-free years. The internal polishing of finish 304 # 3 is welded by Helico in the seams to form a hermetic seal that prevents moisture from migrating in isolation. Each shelf can support up to 130 lb. Heavy duty door hinges, full peripheral gate joints and positive action latch with lock to maintain a safe and uniform seal. The useful life of the compressor is prolonged by modulating the refrigerant flow as necessary. The operating data is encrypted and stored in the user-defined registration files, and can be seen on the tactile screen, or remotely from the PC. This function guarantees an efficient use of the refrigeration system to control the temperature of the camera, which reduces the etnetalá etnetalá ortseun y ,avitida dademuh ecerfo odil'As odatse ed ocirtc'Ále ropav ed rodacifidimuh ortseun n'AicacifidimuhseD / n'Aicacifidimuh .n'AicacifidimuhseD al y n'Aicacifidimuh al atilbahsed/atilbah »Aetnegiletn'Á .n'Aixenocsed adipJAr anu arap selbafuhcne sotnemele ed raludom o:zAesid .dademuh ed lortnoc eneit aramjAc al odnauc ropav ed omusnoc le y sovitarop 11 RFC 12 rep dedivorp osla era segnahc ssecorp rof noitacifitnehtua-er dna gniga drowssaP .sevlehs tcurdorp ruoy sсорa ylmrofinu detubirtsid si ria denoitidnoc serusne metsys lortnoc ria esicerp ruO metsys gninoitidnoc .elbaliava era stinu deloooc-retaw lanoitpO .tnioptes ruoy ot noitarelecca dipar dna lortnoc erutarepmet ecenaretol esolc niatniam ot ngised noitaregirfer sag toh/diuqil lanoitroporp a setaroprocní SEB metsys noitaregirfer lanoitroporpP .retah cirtele eht dna noitcejni sag toh neewteb dellortnoc yllanoitroporp si tuptuo taeh eht .sledom ).f.c411( ediwelpirt dna ).f.c47( ediwelbuod ot elbacilppa seitimrofinu rof noitces noitaceps eht ees: eton \* % 0.3Á ± Á , ot nwod ytilibapac ytimrofinu ytidimuh evitaler \* CÁ \* 1.3.0Á ± Á , ot nwod ytilibapac YTimroFinu eruptarmet hr% 7.0Á ± , nihtiw ot lortnoc ytidimuh Evitaler CÁ Ć Á.0.
